*1 - You'll probably need to remove the PCB-cover from the chassis. Possibly requires modification to body and/or chassis.

*2 - Requires an AWD Wheelbase extension kit. Possibly requires slight modification to body and/or chassis.

*3 - It is not likely that this will fit, although there are some reports on the internet of people fitting this body on this chassis.

Fitting MR-02 bodies on a MR-015 chassis: Add 2.5 mm offset to the front wheel offset value. Rear wheel offset is equal.
Fitting MR-015 bodies on a MR-02 chassis: Decrease the front wheel offset value with 2.5 mm. Rear wheel offset is equal.
Fitting MR-015/MR-02 bodies on a MA-010 chassis: You'll need MA-010 wheels with the right offset value. Offset values for MA-010 and MR-015 are equal. For MR-02 bodies, you will first have to recalculate the offset value from MR-02 to MR-015.
MR-01 and MR-015 are interchangeable. Therefore all MR-01 and MR-015 bodies are listed as MR-015 in this file.
Kyosho has changed partnumber prefixes repeatedly. Therefore it is possible that bodies/parts are available with older or newer prefixes. E.g. Volkswagen New Beetle may be found under MZC-14, MZG-14, MZX-14 and in the future maybe MZP-14. For White Bodies the prefix is MZB or MZN.
The MR-03 is the latest addition to the Mini-Z line-up. The MR-03 is easily converted into narrower wide chassis and basically covers all 2WD chassis' (MR-01, 015, 02). The MR-03 and MR-02 LM use the ASF 2.4GHz band and therefore have a very short antenna which will always fit underneath the body. Bodies specially designed for MR-03 and MR-02 LM do not have an antenna hole. Should you want to fit such bodies on a 27MHz chassis, you'll have to create an antenna hole yourself.
